

Your Device & Context

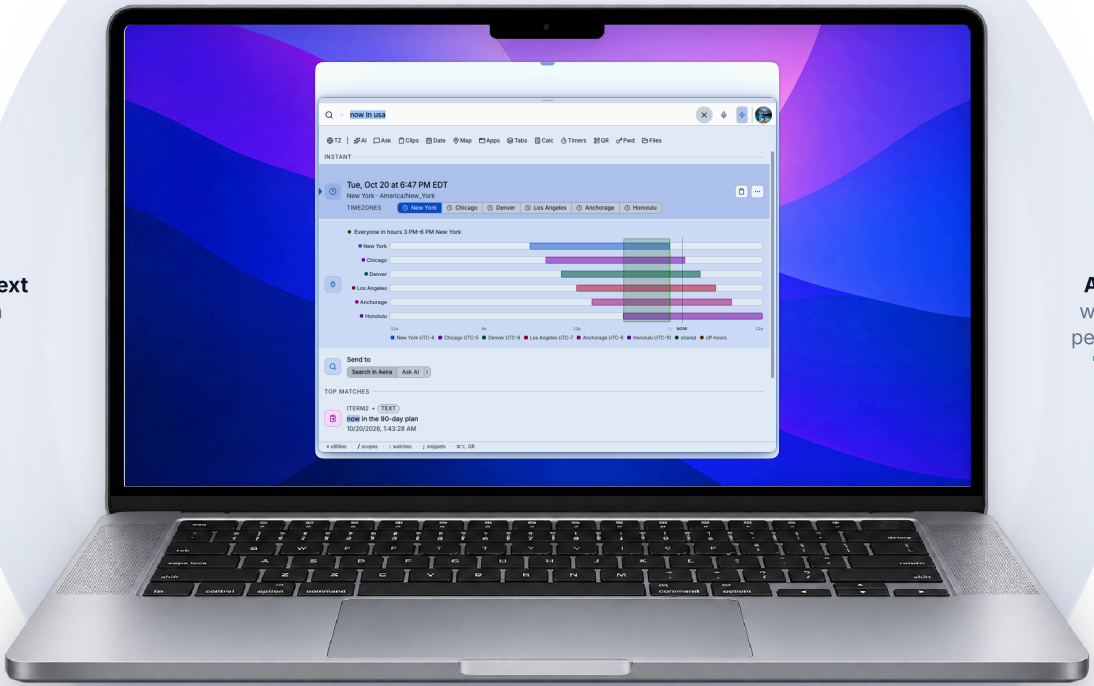

Everything you need: apps, browser, terminal.

-  **On Top of Any App**
Reads the window and selection you are in
-  **Browser Tabs**
Find any open or recent tab
-  **Files & Documents**
Search local and cloud files
-  **Clipboard History**
Encrypted on device, searchable
-  **Notes & Markup**
Quick notes and screenshot annotations
-  **Recall**
Find work and pages you have seen
-  **Calendar & Meetings**
Your day at a glance, one-click join
-  **Email**
Search your inbox, draft replies
-  **Screenshots & OCR**
Search the text inside screenshots
-  **Vision Search (on-device)**
Opt-in model, runs locally
-  **Terminal & tmux**
Commands run only after you confirm
-  **Built-in Browser**
Checks what you send to AI sites
-  **Passwords & Passkeys**
Vault with Touch ID, plus 1Password and Bitwarden
-  **Apps & Menus**
Open apps, press menu items

Your context
stays on
device
→

A governed AI workspace for real work.

Context-aware, on top of any app. Bolt brings your local context, tools, agents and company systems to your fingertips, with your company's rules in the middle.

→
Actions
with your
permission

Your data. Encrypted on device. Masked for AI by your rules.

Governed by default

**Identity
& Access**

**Data
Controls**

**Masking
& Redaction**

**Policies
& Approvals**

**Tamper-Evident
Audit**

Your Ecosystem

Keep your stack. Bolt works with it.

-  **AI Models**
Local, private or frontier. Your key.
-  **Coding Agents**
Claude Code, Codex, Gemini or your own
-  **Agent Gateway**
Masks secrets before agents reach a model
-  **MCP Tools & Servers**
Governed tools. Bring your own server.
-  **ACP & A2A**
Hosts ACP agents, publishes an A2A agent card
-  **SaaS Applications**
Google Workspace, Microsoft 365, Slack, 100+ more
-  **In-House Systems**
REST APIs, databases, file shares
-  **Developer Tools**
GitHub, GitLab, Jira, Sentry
-  **Custom Connectors**
Add any API with a YAML file
-  **SSO & SCIM**
Okta, Entra ID, Google. SAML on web, OIDC.
-  **MDM & Device Policy**
Managed settings enforced on each device
-  **Your DLP Rules**
Import Microsoft Purview rule packs
-  **Browser Extension**
Chrome, Edge and Firefox
-  **macOS, Windows & Linux**
One workspace, every platform

 **Find, plan and act**
From simple tasks to complex workflows.

 **Work with agents**
Use built-in agents or bring your own.

 **Extensible by design**
MCP, ACP, A2A and more. Adapt as the ecosystem evolves.

 **Your data stays yours**
Encrypted, private and under your control.

 **Built for individuals and teams**
Free for individuals. Enterprise controls for teams.
